PROJECTS

Market Trend Analysis Tool 2025

Developed a Python-based tool to analyze historical stock market data and identify trends. Designed to generate actionable insights and visual outputs, enhancing forecasting accuracy and investment strategies.

VoltShare 2025

Designed and developed an innovative energy-sharing platform that facilitates seamless peer-to-peer electricity distribution. Leveraging smart grid technology and blockchain integration, VoltShare enables users to share excess power with their community, optimizing resource utilization and promoting sustainability.

Neuroband 2025

An innovative project that leverages brain-wave sensing and smart analytics to interpret neural signals for interactive control and cognitive insights.

Eventify

Developed Eventify, a MERN stack web application enabling users to browse available events and book slots at preferred timings, with features designed to optimize resource utilization and streamline scheduling, ultimately enhancing user experience and saving time through a responsive interface and efficient booking workflows.
